

Pollock Game

You are a walleye pollock egg in the ocean and your goal is to grow into an adult. In order to do this there must be food, the ocean water temperature cannot be too cold, and you must avoid getting eaten by predators.

Start at the egg and draw a predator card. If the predator eats you then you must draw again on your next turn. Continue drawing cards until one is drawn that does not eat eggs. After drawing cards place them at the bottom of the deck. Next, spin the arrow to find out the ocean conditions that you are living in. If the ocean condition does not affect your life stage then move to the next stage. For each life stage draw a predator card first. If you are eaten, go back to the egg. Otherwise, spin the arrow for ocean conditions. When you reach adult, draw a predator card, if you are not eaten or caught by fishermen, you win!

Fishing Vessel

You have been caught in a fishing net if you are an adult. Other stages spin the arrow to find out the ocean conditions that you are living in.

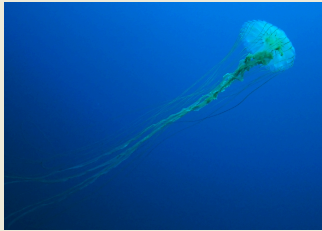

Fishing Vessel

You have been caught in a fishing net if you are an adult. Other stages spin the arrow to find out the ocean conditions that you are living in.

Jellyfish

You have been eaten by a jellyfish if you are a yolk-sac larva, larva, or age-0 juvenile. Other stages spin the arrow to find out the ocean conditions that you are living in.

Seabirds

You have been eaten by a puffin if you are an age-0 juvenile. Other stages spin the arrow to find out the ocean conditions that you are living in.

Seabirds

You have been eaten by a puffin if you are an age-0 juvenile. Other stages spin the arrow to find out the ocean conditions that you are living in.

Euphausiid

You have escaped being eaten by a euphausiid if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

Amphipod

You have escaped being eaten by an amphipod if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

Amphipod

You have escaped being eaten by an amphipod if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

Euphausiid

You have been eaten by a euphausiid if you are an egg, yolk-sac larva, or larva. Other stages spin the arrow to find out the ocean conditions that you are living in.

Euphausiid

You have escaped being eaten by a euphausiid if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

Amphipod

You have been eaten by an amphipod if you are an egg, yolk-sac larva, or larva. Other stages spin the arrow to find out the ocean conditions that you are living in.

Seabirds

You have escaped being eaten by a puffin if you are an age-0 juvenile. All stages spin the arrow to find out the ocean conditions that you are living in.

Marine Mammals

You have been eaten by stellar sealion if you are a juvenile, or adult. Other stages spin the arrow to find out the ocean conditions that you are living in.

Marine Mammals

You have been eaten by stellar sealion if you are a juvenile, or adult. Other stages spin the arrow to find out the ocean conditions that you are living in.

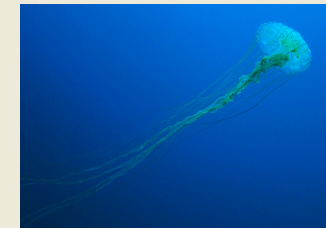

Amphipod

You have escaped being eaten by an amphipod if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

Amphipod

You have escaped being eaten by an amphipod if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

Jellyfish

You have escaped being eaten by a jellyfish if you are a yolk-sac larva, larva, or age-0 juvenile. All stages spin the arrow to find out the ocean conditions that you are living in.

Amphipod

You have escaped being eaten by an amphipod if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

Fish

You have escaped being eaten by a halibut if you are an egg, yolk-sac larva, larva, age-0 juvenile, juvenile, or adult. Spin the arrow to find out the ocean conditions that you are living in.

Fish

You have been eaten by a pollock if you are an egg, yolk-sac larva, larva, age-0 juvenile, juvenile, or adult.

Euphausiid

You have been eaten by a euphausiid if you are an egg, yolk-sac larva, or larva. Other stages spin the arrow to find out the ocean conditions that you are living in.

Euphausiid

You have escaped being eaten by a euphausiid if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

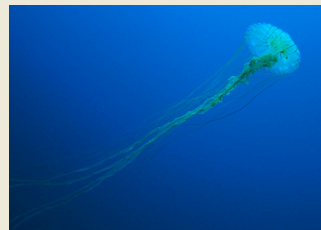

Euphausiid

You have escaped being eaten by a euphausiid if you are an egg, yolk-sac larva, or larva. All stages spin the arrow to find out the ocean conditions that you are living in.

Jellyfish

You have escaped being eaten by a jellyfish if you are yolk-sac larva, larva, or age-0 juvenile. All stages spin the arrow to find out the ocean conditions that you are living in.

Jellyfish

You have been eaten by a jellyfish if you are yolk-sac larva, larva, or age-0 juvenile. Other stages spin the arrow to find out the ocean conditions that you are living in.
